D-5 · FINAL PACKAGE

# ROOTS

## Explore your ROOTS

A festival for children of immigrants and their families
Sat 23 January 2027 · Brussels Expo

THE FESTIVAL IN ONE PAGE

# Children of immigrants who feel cut off from their roots

**Maya, 16, student in Flanders. Filipino mother, a nurse; Flemish father.**

Goal: understand her mother's story and talk to her lola.
Pain: asked "Where are you really from?" and unsure how to answer.

> "I can tell my lola I love her and understand her but I can't have proper conversations with her."

**ROOTS is a festival where young people explore their heritage through food, music and conversations with their elders.**

Young people take part and add their own words to a living archive.

## Explore your ROOTS

**When and where:** Sat 23 January 2027, Brussels Expo

# The key moment

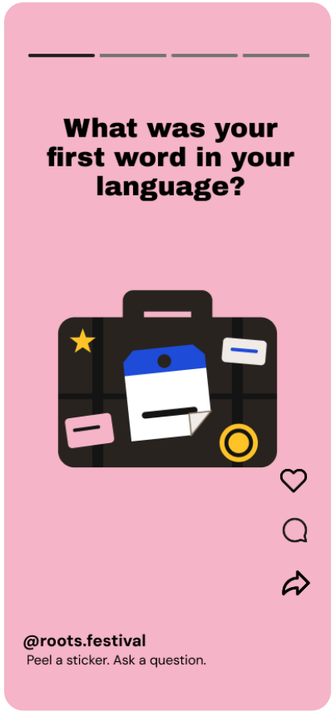

**On a Sunday evening at the kitchen table, Maya taps through a story, asks her lola what her first word was, writes the answer on a sticker and feels proud.**

## The medium

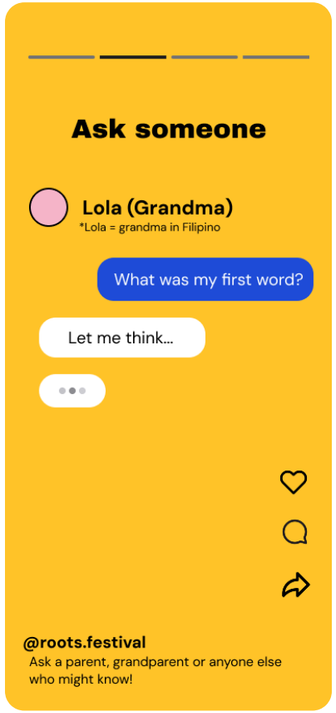

An Instagram Story, 1080 × 1920 px, four frames. Maya watches stories on her phone on the bus and in the evening after school. The story works alone on a screen, then turns into something she does with her family at home. A story is a short sequence she taps through, and it has tools that fit the idea: a question sticker for her answer, a countdown for the festival date and a link sticker to sign up. To make it I need a phone, a real sticker and a marker, plus Figma to prototype it.

**Alternative I did not choose:** a poster at school. It reaches parents too, but it cannot show the sticker being made. (The poster is still used, as the teaser.)

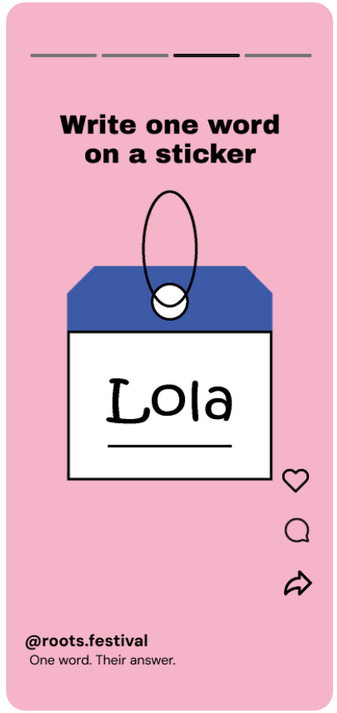

# The touchpoint, step by step

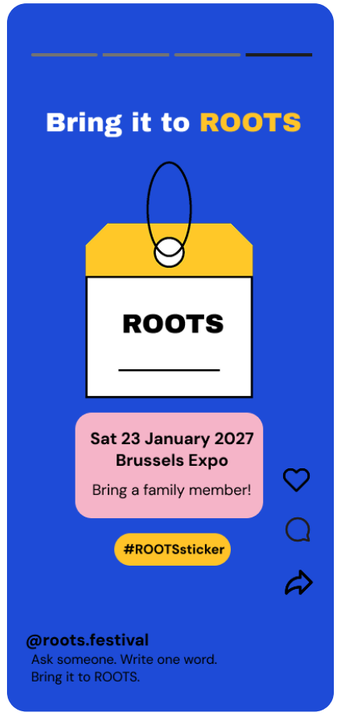

**1** Peel a sticker. Ask a question.

**2** Ask someone. Lola is explained as grandma.

**3** Write one word on a sticker.

**4** Bring it to ROOTS, with date and place.

Clickable prototype: [figma.com/proto/OGVa11VB6Zzg7T8TgTzass/ROOTS-Prototypes](figma.com/proto/OGVa11VB6Zzg7T8TgTzass/ROOTS-Prototypes) · Capture video on Canvas: D5_Ravello_capture.mp4

# Two stakeholder questions, two answers

**“What about people with no relatives?”**

→

### Changed

The story now says “Ask a parent, grandparent or anyone else who might know”. At the sticker desk, volunteer word keepers help anyone who has no one to ask.

You can see it in: story frame 2 · A3 poster · sticker desk

**“How will it help the participants learn their language?”**

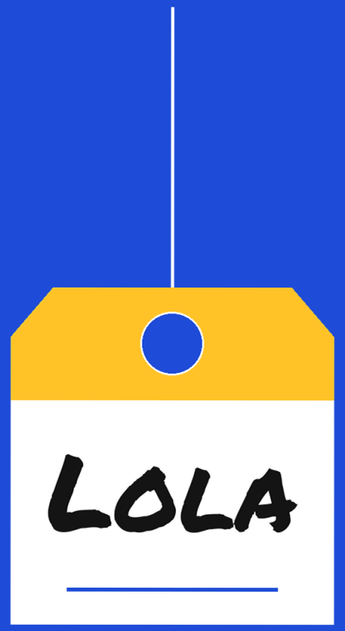

→

### Kept on purpose

ROOTS does not teach a language, and a one-day festival cannot. It starts the conversation and the first word. Learning needs partners such as cultural associations, which is my next step.

Not part of this package

Also changed after test round 1: date and place on the last frame · “Lola” explained as grandma · brighter last frame

ROOTS

@roots.festival

2 – CAMPAIGN

# Key visual

## One tag, one word.

The luggage tag from the logo, written on by hand. It is the same image in every channel.

## Explore your ROOTS

# A3 poster with QR code

**Where:** school hallway, 3 weeks before.

**Goal:** send Maya from the hallway to the story.

**Spec:** A3 297 × 420 mm portrait, 3 mm bleed, 300 ppi, RGB PDF, printer converts to CMYK. File: **2_Campaign/D5_Ravello_poster_A3.pdf**

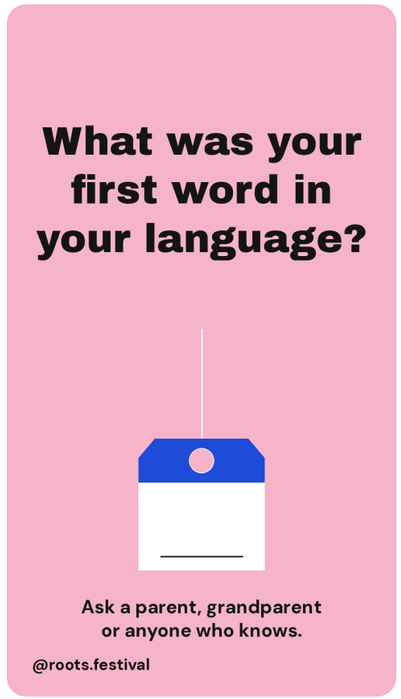

**QR:** opens @roots.festival on Instagram.

Cost: about €0.30 per poster.

# The launch story, 10 seconds

0–2.4 s · the tag is pulled off the suitcase and written on

2.4–5 s · the question

5–8 s · one word, their answer

8–10 s · date, place, hashtag

**Spec:** Instagram Story, 1080 × 1920 px, MP4, 10 s. File on Canvas: **D5_Ravello_motion.mp4**.

# The sticker wall and the sticker desk

**Where:** a blank wall at school (2 weeks before) and the sticker desk at the festival entrance (during).

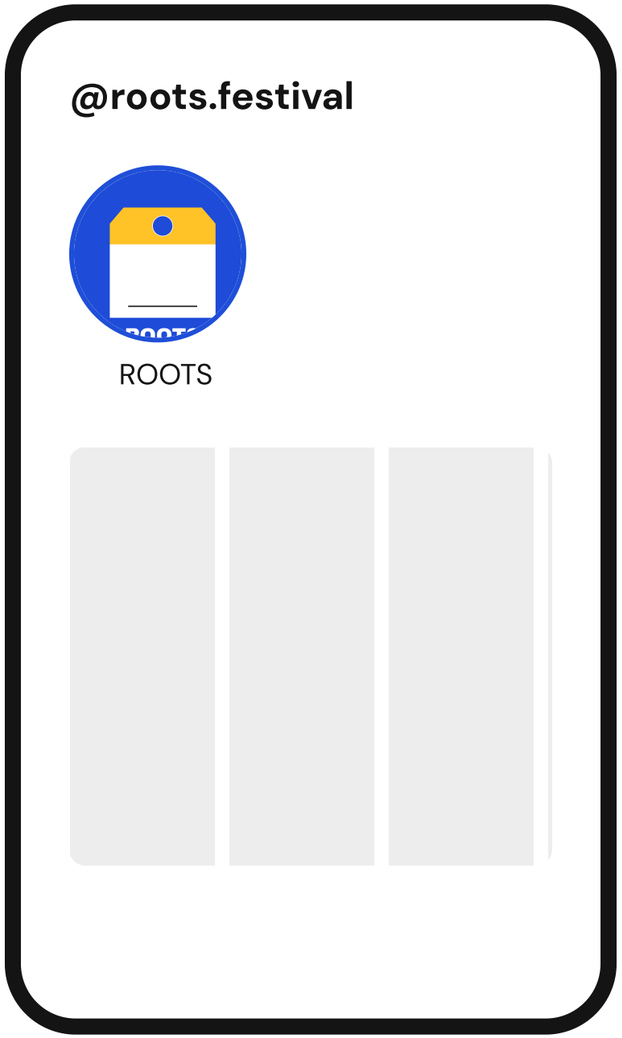

**Goal:** make students stop and write one word; at the festival Maya writes her word and keeps a sticker.

**Word keepers:** volunteers at the desk help anyone who has no one to ask.

**Asset:** A8 writable tag sticker, 52 × 74 mm, 3 mm bleed, RGB PDF, printer converts to CMYK. File: **2_Campaign/D5_Ravello_sticker_A8.pdf**

# Highlight “ROOTS” on Instagram

**Goal:** keep the festival visible and let Maya share her sticker afterwards.

**Content:** story archive plus reposts of photos with #ROOTSsticker.

**Spec:** cover 1080 × 1920 px PNG. File: **2_Campaign/D5_Ravello_highlight_cover.png**

# The motion principle: the tag swings, the word is written

0.0 s 0.8 s 1.4 s 2.4 s

The luggage tag from the logo is pulled off a suitcase and swings once on its string, then the word writes itself on it. Duration 2.4 s, ease-out. The same timing is used in every channel.

# The motion piece: timing and use

| Time | What happens |
|---|---|
| 0–2.4 s | Principle: tag off the suitcase, swing, “Lola” is written, ROOTS appears |
| 2.4–5 s | “What was your first word in your language?” |
| 5–8 s | The tag shows Lola, home, recipe, key |
| 8–10 s | “Bring your word to ROOTS”, Sat 23 Jan 2027, Brussels Expo, #ROOTSsticker |

**Used in:** the launch story on Instagram (3 weeks before) and as a loop on a screen at the sticker desk.

# How you reach Maya

| Channel | Goal | Format | Specs & cost | Launch | Success |
|---|---|---|---|---|---|
| **Instagram Story** (core) | Make Maya curious and get her to ask her family one question | 4 frames with question sticker, countdown and link sticker; 10 s launch video | 1080 × 1920 px (9:16) · MP4/MOV, max 4 GB, or JPG/PNG, max 30 MB · clips of 15 s · free · Figma and CapCut | 3 weeks before (2 Jan 2027) | Replies to the question sticker, shares, link taps |
| A3 poster with QR | Send Maya from the hallway to the story | A3 poster with the tag, the question and a QR code | A3 297 × 420 mm portrait · 300 ppi · 3 mm bleed · no minimum order · €0.30 per poster · QR code from a free generator | 3 weeks before | QR scans |
| Sticker desk | Make her write her word and keep a sticker | Table with blank tags, markers and a wall | 200 A8 stickers, plus tables, chairs and markers · €70 to 100 for all of it together · volunteers as word keepers | During (23 Jan 2027) | Stickers on the wall, words in the archive |
| Highlight “ROOTS” | Keep the festival visible, let Maya share her sticker | Story archive plus reposts with #ROOTSsticker | Same story specs · free · 2 hours | After | Highlight views, new posts with the hashtag |
| **Sticker wall** at school (non-conventional) | Make students stop and write one word | Blank ROOTS tag stickers and markers on a wall | 100 A8 (52 × 74 mm) writable paper stickers, HelloPrint, €28.42 incl. VAT, delivery in less than 5 working days | 2 weeks before (9 Jan 2027) | Stickers on the wall, photos with #ROOTSsticker |

# Campaign rhythm: which asset goes live when

### Sat 2 Jan 2027

# What I tested and how

Round 1 tested prototype v1 of the Instagram Story with **three testers: Dylan, Tasnim and Ayman**. Each did the same three tasks on a phone while I observed without helping, and I wrote down what they did and said. Afterwards I asked four questions about the concept.

| Task | Goal for the tester | Success looks like |
|---|---|---|
| **1** On the bus home after school | Work out what the story wants you to do | They say they should ask someone in their family for a word and write it on a sticker, without being told |
| **2** In the kitchen at the weekend | Give your own answer to the question in the story | They pick a word from their own family or life and write it on a sticker |
| **3** At school on a Friday, as a friend who never heard of ROOTS | Find out if you can go, and when and where | They name the date and the city and say they would bring a sticker with a word, without asking me |

**How I found the testers:** through family and friends on social media. Round 1 and round 2 used different people.

# Round 1: what testers did and said

| Tester | Task | What they did | Where they got stuck | What they said |
|---|---|---|---|---|
| **Dylan** | 1 | Taps through and explains what it is | Where to write down the word | “Where do I write down the word” |
| | 2 | Answers the question | Where to write down the word | “Where do I write down the word” |
| | 3 | Skims all frames | No place and date | “Where is it located and when” |
| **Tasnim** | 1 | Taps through and explains what it is | Where to write down the word | “Where do I write down the word” |
| | 2 | Answers the question | Unknown words in the story | “What does Lola mean” |
| | 3 | Skims all frames | No place and date, last frame not readable | “I can’t find the location and it’s not so readable” |
| **Ayman** | 1 | Taps through and explains what it is | Tries to find a link towards the sticker | “Where do I write down the word” |
| | 2 | Answers the question | Where to write down the word | “Where do I write down the word” |
| | 3 | Skims all frames | No place and date | “Where and when does it take place” |

# Does the concept land? And what I found

| | Dylan | Tasnim | Ayman |
|---|---|---|---|
| Festival about | Learning about your culture | Learning through family | Learning about your culture |
| Word that fits | Layered | Layered | Proud |
| Would you go? | Yes, knowing about your heritage is important | Yes, it brings you closer to your culture and family | Yes, it's a creative way to have children of immigrants participate |

**3 of 3**

got stuck on **where to write the word**, in task 1 or 2.

**3 of 3**

could not find **the date and place**.

**1 of 3**

did not know the word **"Lola"**; one said the last frame was hard to read.

# Round 2: the final version, three new testers

Three new testers (A, B, C) used the final prototype and answered the same questions as in round 1 about the points I had changed. I wrote down their answers.

| Question | Tester A | Tester B | Tester C |
|---|---|---|---|
| **Where do you write down the word?** | "On a sticker" | "I'm not sure what sticker but I'm guessing any is okay" | "On a sticker" |
| **When and where is it?** | "On the 23rd of Jan 2027 at Brussels Expo" | "The 23rd of January at Brussels Expo" | "On the 23rd of January at Brussels Expo" |
| **Who is Lola?** | Grandmother | Grandmother | Grandmother |
| **Would you go, and why?** | Yes: "I'm curious to what I need the sticker for" | Yes: "It seems like an event that will hit close to home and is personal" | Yes: "It seems like an interesting approach to learning culture" |

### Round 1 → round 2

Date and place found: **0 of 3 → 3 of 3**

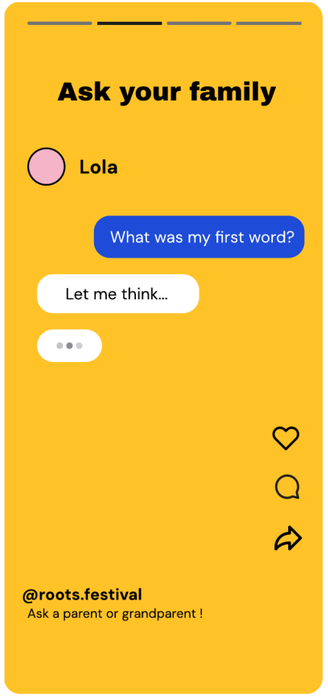

Asked what "Lola" means: **1 of 3 → 0 of 3**; all three said grandmother

Would go: **3 of 3 → 3 of 3**

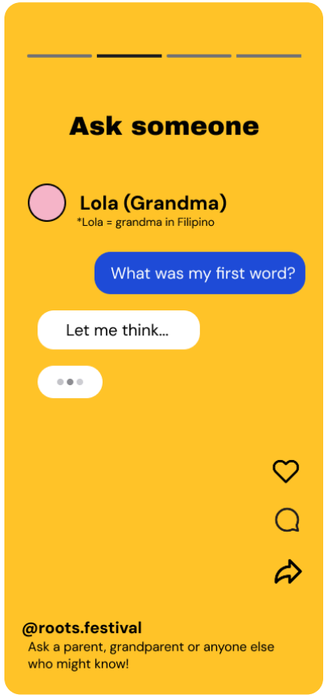

### Still open

Tester B was not sure **which** sticker to use. That matches my decision to say any sticker works (page 20). Three testers is a small group, so this shows the fixes work, not that nothing else can go wrong.

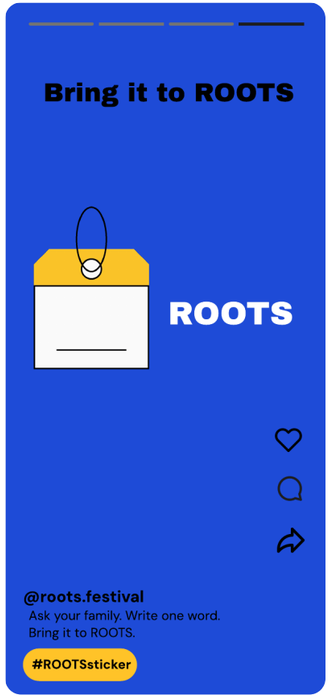

# v1 → v2 → final

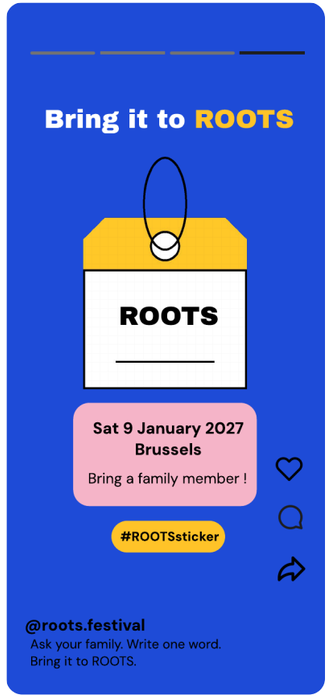

v1 · chat with “Lola”

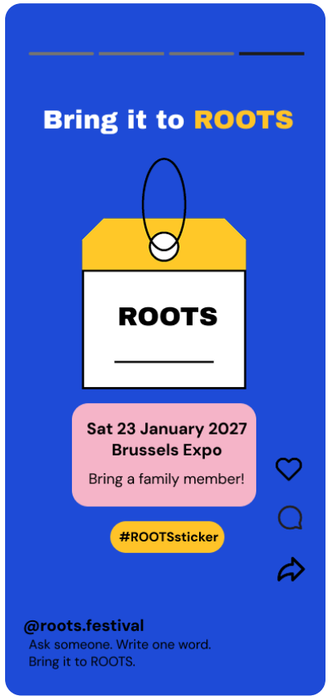

final · “Lola (Grandma)” and explanation

v1 · small tag, no date or place

v2 · date, place, hashtag (pitch)

final · brighter, new date and place

# From evidence to decision

| What I saw or heard | My decision | |
|---|---|---|
| **3 of 3 testers could not find the date and place** | Date and place on the last frame: Sat 23 Jan 2027, Brussels Expo | Changed |
| **Tasnim: “What does Lola mean”** | “*Lola = grandma in Filipino” under her name | Changed |
| **Tasnim: last frame “not so readable”** | A brighter last frame | Changed |
| **Stakeholders: “What about people with no relatives?”** | “Ask a parent, grandparent or anyone else who might know”, and word keepers at the sticker desk | Changed |
| **Stakeholders: “How will it help participants learn their language?”** | ROOTS starts the conversation and the first word. It does not teach a language; partners come next | Kept |
| **3 of 3 testers: “Where do I write down the word?”** | Any sticker works: Maya writes on one she already has, and the school wall and the desk give out blank ROOTS tags. The launch story says so | Kept |
